To Whom it may concern

RE: Glen Morrison

I have been working with Glen for just over a year on various cases. He is careful and diligent in his work and is able to handle difficulties that inevitably surface. I have an office in Northern BC. Glen and I have never met in person.

Glen's investigation has been solid; he was able to deliver on agreed deadlines and within cost estimates. Sometimes I gave him minimal background when embarking on some projects, and at other times a collection of documents, statements and pleadings. The services that he has provided include

- Background review of a pedestrian vehicle collision in an unmarked cross-walk including attending the scene, reviewing the police and other investigator's reports, interviewing witnesses. Glen was able to work with me to obtain copies of the traffic tickets and the conviction as well as document the facts necessary to overcome probably completely the insurer's total denial of liability.
- Assistance in preparation of pleadings and legal arguments in a civil action for negligent investigation of public mischief by making false allegations of rape. The accusers are now being housed by Her Majesty for a brutal attack on his son in addition to the public mischief.

- Investigation of an alleged child sexual assault contact with the local RCMP investigator leading to closure of the police file because only vague hearsay allegations of misconduct were ever made.

- Investigation of background facts concerning a deathbed will and deathbed possible fraudulent conveyance of assets still in litigation.

With a genuine desire to assist my clients, he is hard-working, self-motivated and keen to be known as a top investigator. I have enjoyed working with Glen and believe that he would be a valuable asset to almost any firm seeking energy, clear thinking and directness. Please feel free to contact me by phone or Skype or otherwise regarding my recommendation.

Yours truly

Harvey Gansner
